

Heard and McDonald Islands renova paneles solares

Big Ben has erupted several times over the past two decades. McDonald Island lies 43.5 kilometres due west of Heard Island, and is the major island in the McDonald Islands group. It is a mere 186 metres high and it too has an active volcano. The McDonald Islands are so volcanically active they have doubled in area since 1980.

The Heard Island and McDonald Islands Marine Reserve is currently being reviewed by the Australian government. Current protection levels are inadequate to protect areas of significant conservation value in this region, such as foraging grounds for species like the HIMI penguins. If we want to protect this pristine wilderness and ensure the ...

Invierta con confianza, sabiendo que la calidad de los paneles SunPower Maxeon ha sido comprobada. En pruebas de campo reales durante 8 años y 800 000 paneles en 264 emplazamientos, los paneles solares Maxeon de SunPower demostraron las menores tasas de degradación del sector, Jordan, et al, "Robust PV Degradation Methodology Application" ...

Esto significa que nuestros paneles solares generan más energía que los paneles convencionales. La mayor energía por vatio nominal en comparación con los diez principales fabricantes de energía solar (se sometieron a pruebas 9 de los 10 principales fabricantes, basándose en Photon Consulting 2013, envíos de módulos de silicio).

Commonwealth of Australia since 1953. The Heard Island and McDonald Islands Act 1953 provides the legislative basis for the Territory's administration. Administration of the Territory is the responsibility of the Australian Government department that administers the Heard Island and McDonald Islands Act 1953. This responsibility has ...

sud-sud-est des îles Kerguelen, à 1 ...

Heard Island and the McDonald Islands are free from introduced predators and provide crucial breeding habitat in the middle of the vast Southern Ocean for a range of birds. The surrounding waters are important feeding areas for birds ...

McDonald Island is much smaller (2.5 km²), about 100 000 years old and totally ice-free, and is predominantly composed of phonolitic rocks. 9, 10 During the campaign, signs of volcanic activity ...

Heard Island and McDonald Islands are located in the Southern Ocean, approximately 1,700 km from the Antarctic continent and 4,100 km south-west of Perth. As the only volcanically active subantarctic islands they "open a window into the earth", thus providing the opportunity to observe ongoing geomorphic processes and glacial dynamics. ...

L'isola Heard e le isole McDonald sono isole disabitate che si trovano nell'Oceano Antartico, a circa due terzi di distanza tra il Madagascar e l'Antartide. Esse costituiscono un territorio esterno australiano dal 1947 e contengono i due soli vulcani attivi presenti sul territorio australiano, uno dei quali (Mawson Peak) è anche la montagna australiana più elevata, con 2.745 metri.

Heard Island and McDonald Islands are located in the Southern Ocean, approximately 1,700 km from the Antarctic continent and 4,100 km south-west of Perth.
