

Although this and the new power station are only at the planning stages, the Falkland Islands Government (FIG) has implemented other solutions to reduce reliance on solid fuels. The Director of Public Works, Colin Summers, says the process of making government homes more energy efficient has been going on for over ten years.

CONCERNS were raised by several Members of the Falkland Islands Legislative Assembly at Thursday's meeting of the Assembly following an update by MLA Peter Biggs on progress surrounding the new power station project, in which he spoke simultaneously of a 24-month delivery phase, and a goal of completion by December 2025.

The timetable for the new power station project was laid out in the Legislative Assembly last week. MLA Biggs spoke to tell the house that the concept designs and cost estimates are due to be completed by the end of March, with approval then leading into a 3 to 6 month detailed design phase.

Questions about the timeline for the building of a new power station were asking of MLA Biggs in Thursday's Legislative Assembly. MLA Peter Biggs said that even considering the previous delays, the progress has been made and the estimated completion date of December 2025 was still achievable.

The program, which currently has a budget of £110.5m over the next five years, commits to delivering on a range of projects, from buildings maintenance to constructing a new port and power ...
