

# How to install photovoltaic waterproof gusset plate

How do you install solar PV on a slate roof?

See a case study of a tiled roof here To install solar PV on a slate roof,our installers would use solar limpets. They drill through the slate into the rafter using two fixing holes,sealant is applied to the fixing holes and the base of the limpet. The solar limpet is then screwed onto the roof.

Can solar PV be installed on a flat roof?

To install solar PV on south facing flat roof we would use a ballasted system. This means the roof is not penetrated (which would let in water on a flat roof),and the system is unable to be lifted or tipped over by the wind. The triangular mounting frames are preassembled and placed on aluminium feet.

How to adjust GSE plates?

to adjust the GSE plates,use the graduations on the plate. The graduation vary from 0 to 40 mm. After having s rewed all the mounting plates at the 2 center points,you can start preparing your &#248; 10 mm drill bit. And pre-dril )For a panel H1002,position the plate at 10mm back For a panel H1012 = 20mm backWEDGES POSITIONNINGThe 2

How do you install solar PV on a tiled roof?

So here's our guide to trusted mounting solutions for all different roof types. To install solar PV on tiled roofs, our installers slide up the tiles to reveal the wooden roof joists underneath. A U-shaped hook screws into the joist, and the tiles slides back down over the hook - once again making the roof completely waterproof.

How to install GSE panel flashing?

Make cuts on the attach angle at the position of the GSE panel corrugations. Assemble the top flashing with the junction and the corner pieces. Apply a seal joint at each junction between 2 pieces. Cut the corner flashing in two distinct pieces. Adjust the height of the corner flashing by overlapping the two pieces.

How to install a PV field?

BOTTOM: the butyl strip of 10cm is laid on the tiles. When installing all the way to the eaves, the PV field can be connected directly to the gutter with a waterproofing strip or a drip flashing. Assemble the other half-frames laterally thanks to the ergot and vertically. Fix them the same way than described in 1.
