

# How to use the Shouhang PV Inverter app

Can I use a solar app on my inverter?

You monitor your solar panel usage using a solar monitoring system connected to your inverter. These systems often come with apps that provide real-time data on your daily solar energy production, consumption, and savings. 2. Can I use a solar app for iPhone or Android devices? Yes, solar apps are compatible with both iPhone and Android devices.

Are solar monitoring apps good for microinverters?

The Enphase Enlighten app excels in panel-level monitoring and system health tracking, making it ideal for users with Enphase microinverters. It's user-friendly and delivers crucial insights into energy management. Despite the many benefits of solar monitoring apps, they can have some drawbacks. Here are a few common issues to be aware of: 1.

Are solar panel apps compatible with different brands or inverters?

Certain apps are only compatible with specific brands or inverters, limiting your flexibility if you want to mix components from different manufacturers. Always check compatibility before committing to a solar panel app to avoid integration issues down the line. 4. Connection Issues

How do I connect soliscloud to my inverter?

SolisCloud Monitoring APP ( Android ) SolisCloud Monitoring APP ( IOS ) Connecting to your Inverter (First time login for INSTALLERS) To establish a local connection, ensure that your device's Bluetooth is enabled. Open the SolisCloud App and DO NOT LOGIN. 1: Navigate to the "More Tools" button on the bottom right-hand side.

What is a third-party solar inverter app?

Third-party apps are developed by companies that are independent of the solar inverter manufacturers. Unlike proprietary apps, which are designed specifically for a particular brand (e.g., SolarEdge's MySolarEdge or Fronius's Solar.web), third-party apps like Catch Control's Solar Analytics are designed to work across multiple brands and systems.

How to install a PV plant?

Connect to the management system. After the commissioning is complete, remove the USB-WLAN module, install the 4G module. Check the indicator status. After the indicator is steady green or blinks at short intervals (on for 0.2s and then off for 0.2s) add a PV plant. Add a plant.

This help document is designed to guide you through the App view when locally connecting to your inverter via Bluetooth. By following the steps outlined below, you'll gain access to quick settings and a comprehensive array of standard ...

# How to use the Shouhang PV Inverter app
