

What is a battery backup / ups?

Exists when a line interactive Battery Backup/ UPS has an autotransformer that regulates low voltages (e.g., brownouts) without having to switch to battery. Provides clean, consistent AC power by automatically regulating low voltages and over voltages, within defined tolerances, when incoming utility power has minor fluctuations.

What is a battery backup runtime?

The battery backup runtime of the UPS is the estimated time it will keep connected equipment powered during an outage, without an opportunity to recharge its batteries. Runtime varies depending on the size of the UPS battery and the wattage required by the connected equipment, as well as factors like efficiency, room temperature and battery age.

What is a battery backup & AVR?

Battery backup supports equipment during outages. AVR corrects power sags (brownouts) and overvoltages. Surge protection blocks harmful transient voltages on AC, phone, network and coaxial lines. The multifunction LCD screen displays power conditions and provides easy access to settings.
