Can the Faroe Islands be a smart microgrid?

"The energy system in the Faroe Islands is an impressive example of how all available energy resources can be integrated into a smart and innovative microgrid," says Vehkakoski.

Are there renewables in the Faroe Islands?

"In the Faroe Islands, we are blessed with renewables: we have wind, hydro and some sun in the summer; we also have tidal and wave power where we can see great potential," says Nielsen. Since announcing its green vision in 2014, SEV has already done a lot to increase the share of renewables in its energy mix.

What is the main industry in the Faroe Islands?

Fishing is, and has been for many decades, the main industry in the Faroe Islands with its products, including farmed salmon, representing more than 95% of total exports, and around 20% of Faroese GDP. "Producing fish meal and oil requires quite a lot of energy.

IDD Energy's project team organise, run and report on energy efficiency projects for our customers. The team covers a wide variety of roles and requirements, allowing us to plan and implement large projects to a high standard - and deliver them on time.

The Faroe Islands are aiming for complete sustainable energy supply by creating a smart and innovative micro-grid. Far from continental Europe and surrounded by a vast sea, the Faroe Islands lie in the middle of the North Atlantic between Iceland and Norway.
