

## Is it reliable to install photovoltaic panels directly on the roof

Can you install solar panels on a roof in the UK?

The majority of UK homes have a roof suitable for solar panel installation. Great news for anyone looking to generate their own renewable electricity. If you'd like to speak to an MCS certified (or equivalent) solar installer for advice - you can get free no-obligation quotes from up to 4 solar installers in your area using Solar Guide.

Can a roof be suitable for solar panels?

Even a roof that doesn't match the ideal requirements can still be suitable for solar panels. Part of the personal recommendation provided by Solar Together will be a breakdown of any additional costs needed to cover a variety of roofs. Often, roof characteristics will instead affect the output which solar panels generate.

Can a solar PV system be installed on a roof?

In general, there should be no need to fret, as solar PV can be installed on almost any roof type. Most roof materials are suitable for a solar PV system. However, three types of roofing are excluded for the placement of a solar PV system: Thatch roofs: As this increases fire risk.

Are in-roof solar panels better than traditional solar panels?

In-roof solar panels are aesthetically pleasing and seamlessly blend with the roofline. However, their efficiency is usually 5-10% lower than regular solar panels. Do traditional solar panels look bulky and less attractive? Then, consider installing integrated solar panels instead.

Are roof-integrated solar panels a good investment?

Roof-integrated solar panels in the UK are quite the initial investment, yet they can lead to substantial savings in the long run. Based on your property size and the solar panel size, in-roof solar panels in the UK can save you between £440 and £1,005 a year.
