Does Costa Rica have an electricity grid?

Only a few countries have developed an electricity grid powered mostly by renewable sources. Surprisingly, Costa Rica is one of them. For years, Costa Rica has relied on clean energy for up to 99% of its electricity, putting it in the league of innovative countries like Iceland, Norway and New Zealand.

What is Costa Rica's energy policy?

Costa Rica's energy policy aims to move from a fossil fuels based energy system towards renewable energy sources and to expand its power generation capacity, replacing old power generating stations and developing new projects.

How did Costa Rica start generating electricity?

They started building hydroelectric plants and bringing electricity to every corner of the nation," said Gutiérrez. Costa Rica later began to gradually diversify its energy production. "We exploited our geothermal sources, but when greenhouse gases became a concern, ICE began to focus on wind energy."

What is the Energy Outlook for Costa Rica?

This information is based on IEA analysis carried out within the framework of Latin America Energy Outlook 2023. Costa Rica Energy Profile - Analysis and key findings. A report by the International Energy Agency.
