

Can a new energy storage facility be built in Israel?

(Sue Surkes/Times of Israel) An Israeli company that has developed a unique method of storing renewable energy using air and water announced Wednesday that it has signed an \$8 million agreement in principle with the Israel Electricity Corporation to build the first facility of its kind in the world, in Dimona, southern Israel.

Will Israel create a 'kosher' energy network for ultra-Orthodox Jews observing the Sabbath?

REUTERS/Mussa Qawasma JERUSALEM, May 7 (Reuters) - Israel approved on Sunday a plan to create an energy storage network in cities to produce off-peak electricity, which will also supply "kosher" electricity for ultra-Orthodox Jews observing the Sabbath.

Could ultra-Orthodox Jews be able to use electric power during Sabbath?

Ultra-Orthodox Jews in Bnei Brak, Israel. (Oded Balilty/AP) JERUSALEM -- Religious Israel may soon have access to electric power that rabbis have approved for use during the weekly Sabbath, a techno-spiritual innovation that reflects advancements in battery science and, even more, the power of ultra-Orthodox parties in Israel's new government.

Will Israel build a megawatt power plant?

It will be built by state-owned Israel Electric Corp for up to 120 million shekels (\$33 million) and privatised after three years. If successful, hundreds of megawatts in storage facilities will be built nationwide, the ministry said, without giving a timeframe. Our Standards: The Thomson Reuters Trust Principles.

Why did Yogev develop the air battery system?

Or Yogev developed the Air Battery system as a way of solving one of the renewable energy field's largest paradoxes: renewable energy is very commonly stored in rare-metal lithium-ion batteries, which have a heavy negative impact on the environment. Yogev's goal is to move away from these wasteful resources and toward something cleaner.
