

Does decentralisation drive energy security in Ukraine?

Despite the high investment risks, the construction of a more decentralised system has begun, increasing resilience to attack and laying the groundwork for a distinctive longer-term transition pathway. In contrast with other countries, where decentralisation has been driven by sustainability concerns, the clear driver in Ukraine is energy security.

How important is interconnection to Ukraine's electricity security?

Interconnection with the main European system ⁴ has made a crucial contribution to Ukraine's electricity security, with the limit on cross-border trade ⁵ increasing to 1.7 GW in November 2023. Before the 2022 invasion, Ukraine's power system was interconnected with the Russian and Belarussian grids.

What happened to Ukraine's heating & natural gas infrastructure in 2022?

Ukraine's district heating and natural gas infrastructure has also been targeted. Since 2022, 18 large combined heat and power (CHP) plants have been damaged or completely destroyed, along with more than 800 boiler houses. Some above-ground natural gas storage infrastructure has been damaged, although underground inventories remain unaffected.

Ukraine's air defences provided some protection, but the scale of the attack and the resulting disruption highlighted once again the vital strategic importance of Ukraine's energy sector, as well as the ever-present risks to the country's ...

World Wind Energy Association (WWEA) Board has decided to set up a Technical committee with Dr. Jami Hossain as the Chair. The objective of the committee is in general to address emergent technical issues in the industry and the sector, development and strengthening of databases, tracking trends in technology & innovation and to come up with in-depth studies and reports.
