Jascon Energy makes a product simpler and more reliable than it has ever been before.

How much does electricity cost in Turks and Caicos?

The 2015 electricity rates in Turks and Caicos are \$0.29 per kilowatt-hour (kWh), slightly below the Caribbean regional average of \$0.33/kWh. Like many island nations, Turks and Caicos is almost 100% reliant on imported fossil fuel, leaving it vulnerable to global oil price fluctuations that have a direct impact on the cost of electricity.

Does Turks and Caicos have a policy on energy efficiency?

Turks and Caicos has few policies related to energy efficiency and renewable energy. Historically, the territory has not implemented policy mechanisms to aid in the development of clean and energy-efficient technologies.

Could ocean thermal energy help Turks and Caicos meet its peak demand?

Once wave and ocean thermal technologies are proven in the marketplace, ocean energy and ocean thermal energy conversion have potential as well. Abundant wind and solar resources, as well as the potential for other renewable sources could help Turks and Caicos meet or exceed its peak demand of 34.7 MW.

Who owns Turks & Caicos electric grid?

The government-owned Turks and Caicos electric grid was privatized in 2006 through a series of acquisitions to create a vertically integrated structure. FortisTCI, a wholly owned subsidiary for Fortis Inc., is an international utility holding company that owns and operates generating stations and distribution lines across the islands.
