

Who is Solarity Jordan?

complete information about products. so that you don't miss any news! Solarity Jordan is a distributor and solutions provider of photovoltaic (PV) systems offering a complete assortment of solar modules and inverters.

Does Jordan have a solar energy policy?

Jordan has implemented several policies to encourage the growth of solar energy in the country. In 2012, the government introduced a feed-in tariff system that offers a fixed rate for solar energy producers to sell their electricity to the grid.

What is the outlook for solar energy in Jordan?

Looking ahead, the outlook for solar energy in Jordan is positive. According to a report by the International Renewable Energy Agency (IRENA), Jordan is expected to increase its solar energy capacity to 2.7 GW by 2023, up from 1.7 GW in 2020.

What is the solar energy potential in Jordan?

The solar energy potential in Jordan is enormous as it lies within the solar belt of the world with average solar radiation between 4 and 8 kWh/m², which implies a potential of 1400-2300 GWh per year annually.

How does Jordan support the development of solar energy?

In addition, Jordan has signed several agreements with international organizations and foreign governments to support the development of its solar energy sector. For example, in 2018, Jordan signed an agreement with the International Finance Corporation (IFC) to support the development of a 200 MW solar project in the country.

Could rooftop solar power be the future of energy in Jordan?

According to the IRENA report, rooftop solar installations could account for up to 1.4 GW of solar energy capacity in Jordan by 2030. This presents an opportunity for households and businesses in the country to generate their own electricity and reduce their reliance on the grid.

Solar LED floodlight in blue, with 600W power, photocell and remote control. It has a photocell to automatically turn on at sunset and a remote control to control it from a distance. It emits cool white light, which is assigned to the Kelvin scale with values from 5000K to 6800K. Cool white tones are bluer [...]
