

What does the renewables readiness assessment mean for Bosnia & Herzegovina?

"The Renewables Readiness Assessment represents an important step in the process of gradual transition from fossil fuels to renewable energy sources on the way to the decarbonisation of Bosnia and Herzegovina's energy sector by 2050, for which we are grateful to IRENA.

What is the integrated energy and Climate Plan in Bosnia & Herzegovina?

1.1.3.3 Policies and measures to achieve goals The Bosnia and Herzegovina integrated energy and climate plan prescribes policy instruments and appropriate measures to achieve the goals by 2030. An overview of the plan policies and measures is given in the Table below. Establishing the legal obligation to perform a cost-benefit analysis.

How is energy produced in Bosnia and Herzegovina?

Energy production in Bosnia and Herzegovina is carried out using primary energy from solid fuels, wood biomass, hydropower, as well as other forms of RES (solar and wind energy).

How to promote energy transformation in Bosnia & Herzegovina?

Promote the implementation of programmes, priority measures, and activities in the sector of energy transformation, transmission, and distribution of natural gas, planned within the existing strategic and planning documents and relevant energy companies. In 2021, Bosnia and Herzegovina imported practically all quantities of oil derivatives.

Does Bosnia and Herzegovina need regional cooperation?

Consideration of regional cooperation in the energy and climate plan of Bosnia and Herzegovina recognises the importance of synergy and joint action with other countries in order to achieve sustainable energy goals and reduce greenhouse gas emissions. This collaboration can bring many benefits, including:

What role does natural gas play in decarbonization in Bosnia & Herzegovina?

Natural Gas: In the context of the ambitious decarbonization scenario in Bosnia and Herzegovina by 2030, natural gas can have a certain role in the energy mix in final energy consumption. Although natural gas is a fossil fuel and emits greenhouse gases during combustion, it is considered less polluting than other fossil fuels such as coal and oil.

the energy sector 42% Bosnia and Herzegovina submitted to the Secretariat its draft NECP within the prescribed deadline. Also its long-term low-emission development strategy was sent to UNFC - CC. The Federation of Bosnia and Herzegovina adopted a renewable energy law and an energy labelling regulation,

Specific energy consumption of heat energy and electricity is still quite high in Bosnia and Herzegovina compared to developed and some developing countries. Proof for that is the specific energy consumption in
