

Is solar energy a viable energy source in Kazakhstan?

In 2019, another solar power plant in Kazakhstan, Saran, with a capacity of 100 MW started its operation in the Karaganda region (Satubaldina, 2020). According to the International Energy Agency (IEA), within the period of 40 years, solar energy has a potential to meet about 20-25% of the energy demand of the country.

Is Kazakhstan a good place to invest in solar power?

Kazakhstan has remarkable solar potential with a very well-designed auction system, a clear renewable capacity addition schedule, and a solid decarbonisation target. The country is now also including storage systems as part of its public procurement strategy in a move that will ease further integration of renewables into the grid.

What is Kazakhstan's First Solar power plant?

The plant is to produce solar cells using Kazakhstan's silicon. The designed capacity of photovoltaic wafers is 50 MW with a potential to increase up to 100 MW. In 2012, the first solar power station, "Otar," that generates 0.5 MW of energy, was also built in the Zhambyl region.

Where are solar power plants located in Kazakhstan?

In 2019, Nurgisa solar power plant with a capacity of 100 MW in Kapshagay, Almaty region started its operation (informburo.kz, 2019). In 2019, another solar power plant in Kazakhstan, Saran, with a capacity of 100 MW started its operation in the Karaganda region (Satubaldina, 2020).

Can solar power drive Kazakhstan's Energy Transition?

However, Kazakhstan's solar ambitions do not fully tap into its potential, and the technology could play a far larger role in the country's energy transition due to its low cost and flexibility. The focus now is on leveraging solar's comparative advantages to drive forward Kazakhstan's decarbonisation and harness its significant solar resources.

How much solar power does Kazakhstan have?

In just five short years, solar power capacity has catapulted to 300 megawatts nationwide, and if you add other renewables like wind and hydropower, that number exceeds 700 megawatts, enough power to supply around 200,000 families in Kazakhstan. To understand just how remarkable this is, you have to know the context.

ASTANA - Kazakhstan is set to launch a solar panel production line following the delivery of equipment within 1-1.5 months, Kazinform reported on Feb. 13, citing the Kazakh Ministry of Science and Higher Education.

The Kapshagay photovoltaic power station, one of the largest single solar power projects in the Central Asian country, is a part of the China-Kazakhstan green energy cooperation initiative, jointly invested in and constructed by the Chinese company Universal Energy and Kazakh counterparts.

In just five short years, solar power capacity has catapulted to 300 megawatts nationwide, and if you add other renewables like wind and hydropower, that number exceeds 700 megawatts, enough power to supply around 200,000 families in Kazakhstan.

Find solar panel locations in Kazakhstan through our Kazakhstan solar farm map. Analyze the main characteristics of solar farms in this country, sort these by capacity, panels area and landscape area. Discover the largest solar farms in Kazakhstan and find solar farms near you.

Balkhash Solar PV Park is a 100MW solar PV power project. It is located in Karaganda Region, Kazakhstan. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active. It has been developed in multiple phases. Post completion of construction, the project got commissioned in June 2022.

Solar power has a great potential as a renewable energy resource due to sparsely populated large areas and the climatic conditions, especially in southern Kazakhstan with an annual sunshine of 2200 to 3000 hours.

The new pv installation in Kazakhstan exemplifies how solar energy can be effectively harnessed to power agricultural activities. By utilizing Eco Green Energy's Atlas 550W PV modules, the project ensures a reliable and sustainable energy source for greenhouses, thereby aiding in the decarbonization of agriculture.

The Solar Resources Atlas of Kazakhstan is developed by the company «Sapa Pro& Tech» Solar resources Maps of solar radiation indicators (direct, diffuse, total, etc.) constructed on the basis of climatic bases that are in open access (NASA SSE, Sustainable Buildings, SARAH-E)

Kazakhstan has remarkable solar potential with a very well-designed auction system, a clear renewable capacity addition schedule, and a solid decarbonisation target. The country is now also including storage systems as part of its public procurement strategy in a move that will ease further integration of renewables into the grid.

On Sep. 26, 2024, Azhur, a Kazakhstani company from Shymkent, won a contract to construct a 20-MW solar power plant by offering a bid significantly lower than the starting price. However, the company owned by Anuarbek Karamanov primarily specializes in fruit harvesting and horse breeding.

This report builds on the first edition of solar investment opportunities in Kazakhstan. This update contains the latest economic and political advancements in the country, including the announcement of Kazakhstan's new decarbonisation target for 2060, and the recent Memorandum of Understanding signed between the EU and Kazakhstan, stepping up ...
