

How did Kehua achieve a high-performance energy storage system?

As the first pioneering project to combine semi-solid state batteries with energy storage system, Kehua adopted four 1.25MW high-performance energy storage converters, which were connected in parallel to a single 5,000kVA transformer, achieving a 35kV AC grid-connected output, which ensured the high efficiency and stability of power transmission.

Is Kehua a PV+ESS solution expert?

The first large-scale energy storage test demonstration project in the network domain approved by the National Energy Administration - Gansu 720 MWh Large-Scale Energy Storage Power Station. Guided by the goal of carbon neutrality, Kehua is evolving toward "PV+ESS Solution Expert" status in the new energy field.

Who is Kehua digital energy?

Kehua Digital Energy, with 36 years of power electronics expertise, offers comprehensive solutions in photovoltaics, energy storage, and microgrids. With installations exceeding 46GW in PV and 15.2GW/8.2GWh in energy storage globally, Kehua is a Tier 1 clean energy provider committed to promoting a zero-carbon future.

Is Kehua a technical homology in energy storage?

Fundamentally, an energy storage system still relies on power electronics for energy exchange, which reveals a very important factor for inverter companies flooding into the energy storage field - technical homology. For Kehua, however, the technical homology merely lies in the accumulation of inverter technology.

Who is Kehua?

Kehua has been working across energy storage inverters, energy storage systems and microgrid systems for more than 10 years, and has accumulated huge experience in power electronic technology over the 33 years of its existence, with countless application scenarios explored.

Is Kehua a good energy storage product?

As a residential product, in addition to its aesthetically pleasing design, it combines Kehua's experience in technology and application in the energy storage industry. While ensuring the safety of residential electricity consumption, it can also improve the rate of self-generated electricity and increase return on investment.

Based on decades of technological accumulation, Kehua's current PV inverter has a cumulative installed capacity of over 18 GW around the globe, and is used in large-scale ground power stations ...

The spotlight was on Kehua's new S³-EStation 2.0 5MW/10MWh intelligent liquid-cooled energy storage system with grid-forming features. The solution integrates a 5MWh liquid cooled battery energy storage system and a 5MW MV Skid, supported by over 100 patents and featuring three key technological
