

Who is aprovis Energy Systems GmbH?

Aprovis Energy Systems GmbH - Specialist In Exhaust Gas And Gas Treatment Technology. In a very short space of time, APROVIS has established itself as an innovative energy company on both the national and the international market. Our expertise lies in exhaust gas and gas treatment technology.

Will Kosovo use solar energy for district heating?

In late December 2022, Kosovo became the first country in the Western Balkans Economy to use solar energy for district heating. Kosovo's Minister of Finance, Labour and Transfers, Hekuran Murati, said the project would ensure access to the central heating system for about 38,000 citizens.

How can Kosovo improve its energy sector?

The Group's commitment to helping Kosovo improve its energy sector is broad: projects are designed to improve energy efficiency, ease the policy and regulatory environment for renewable energy and energy efficiency, address the environmental legacy of the old power plants, upgrade power generation to meet demand, and improve water supply.

How did Kosovo get its own energy system?

Kosovo was part of the Regional Energy Community and was connected with the regional system through interconnections with Serbia, North Macedonia, Montenegro and Albania. KOSTT made an agreement with ENTSO-Eso Kosovo gets his own independent region of energy administration. Kosovo gets full independence and control of its energy industry.

Who is Kosovo Energy Distribution & Supply Company (KEDS)?

Kosovo Energy Distribution and Supply Company (KEDS) is a company operating throughout Kosovo having the exclusivity for electricity supply and distribution in the territory of Kosovo. Since May 2013, Kosovo Energy Distribution and Supply split from Kosovo Energy Cooperation and started its operational activities as a joint stock company.

Why do you need aprovis components & system solutions?

APROVIS components and system solutions are required in many applications. This is because APROVIS, as the sole provider in the combined heat and power (CHP) market, offers turn-key solutions for fuel gases of gas engines as well as complete systems for the exhaust gas duct of CHP units.

APROVIS's strength lies in the fact that it generates system solutions. We view the exhaust gas section and gas treatment as complex energy cycles where every detail and every process step is important. We operate in a market that is placing ever-greater demands on us in terms of noise and pollutant emissions.

APROVIS utiliza un software propio (APROVIS Controlling System, ACS) y permite el telemantenimiento

y la puesta en servicio remota con soporte digital. Las conexiones de comunicación (sistemas de bus de campo) transmiten los datos del mando del generador de vapor al sistema de control principal de la planta de cogeneración.

Le ofrecemos las soluciones APROVIS. Pensamos en clave de sistema y suministramos componentes e instalaciones que funcionan perfectamente coordinados. Consulte a nuestros especialistas para encontrar la solución perfecta para usted. Soluciones integrales de APROVIS. Construimos sistemas bien coordinados a partir

Additional insulation: APROVIS insulates the exhaust gas heat exchanger for the operator as needed. So no heat is lost and contact with the surface is safe. Heat use: On request, APROVIS combines the water side of the exhaust gas heat exchanger with the coolant side of the engine to form a single unit for heat use. This is done using valves, pumps and plate heat exchangers.

5 ???· Pristina, Kosovo - December 16, 2024 The Millennium Challenge Account (MCA) Kosovo has officially launched the pre-qualification process for the design and build of Utility ...

At APROVIS, we provide professional support for your systems throughout their entire lifecycle. Teams of technicians know your project inside-out and will help you to optimise your plant. Spare parts are available quickly and ready for use on site too, thanks to our extensive service network.
