

What does Koc do in Kuwait?

State-owned KOC undertakes exploration, drilling and production of oil and gas in Kuwait. This interview is featured in The Energy Year Kuwait 2023. What are the key projects underpinning KOC's strategy for increasing Kuwait's oil production capacity to 4 million bopd?

Does Koc have heavy oil reserves in North Kuwait?

However, KOC has discovered huge heavy oil (HO) reserves in North Kuwait. This resource is considered a strategically important crude type, despite its relatively high cost of development, because we have a large HO reserve which needs to be exploited.

What is Kuwait's strategic target for non-associated gas?

Kuwait's strategic target for non-associated gas is set based on the early discoveries in 2005 of the North Kuwait Jurassic layers. KOC has set a three-phase plan to achieve 950 mcf [27 mcm] per day from this resource.

What is Kuwait known for?

Kuwait is known for producing Kuwait Export Crude (KEC), which is recognised globally for its quality. However, KOC has discovered huge heavy oil (HO) reserves in North Kuwait.

How is Kuwait transforming its energy policies?

AL EIDAN: Kuwait is transforming its energy policies to align with both global environmental standards and domestic economic targets. This process involves embracing renewable energy, enhancing energy efficiency and embedding sustainability in operations.

What role do local companies play in New Kuwait 2035?

AL EIDAN: Local companies in the energy sector play a multifaceted role in achieving the objectives set forth in New Kuwait 2035. First, by increasing local participation in the energy supply chain, we are nurturing a more self-reliant industry.
