

Critics warn of hidden costs in forging ahead with more dams . Electricity generation factory in southern Laos / Credit: Visarut Sankham. Attapeu, LAOS_Debate over Laos" strategy to become the "Battery of Asia" has continued months after the deadly collapse of a section of the Xe Pian-Xe Namnoy hydropower dam as the Lao government invests in more ...

The country currently imports 25 percent of its electricity from Laos, Vietnam and Thailand. The push for further electricity trade between the two nations emerges as Laos positions itself to become the "battery of Southeast Asia," while Cambodia enhances efforts to meet electricity demand as the economy rapidly expands.

Laos might end up being a battery in an all-too-literal sense - a power source that is owned by, and benefits, someone else. The Lao government cannot afford to run its own power grid.
