The Lapotronic Energy Storage Unit allows you to store a variable amount of EU between 1 million and 2 billion. This amount can be increased by adding LESU-Blocks from a structure of LESU-Blocks stretching from the main LESU. To create a LESU structure, a central Lapotronic Energy Storage Unit...

The Lapotronic Energystorageunit (LESU) is an EU storage block added by GregTech 1. On its own, the LESU can store up to 1,000,000 EU and output up to 5 EU/t. However, when an LESU-Block is placed next to an LESU (or another connected LESU-Block), the LESU's maximum capacity gets increased by 1,000,000 EU, and its maximum output by 1 EU/t ...

???????????? ??????????????& #160;-- ??? ?????? L.E.S.U. (Lapotronic Energy Storage Unit). ?????????? ?????? L.E.S.U. 1 000 000 ?. ?????? ??????????& #160;-- ?? 32 ??/?. ?????? ??????????& #160;-- ?? 5 ??/?. ?????????? ?????? ????????????????? ? ...

The Lapotronic Energy Storage Unit (LESU) is a multi-block structure added by GregTech 3, and is used for storing Energy Units. Without upgrades, the LESU has a maximum input of 32 EU/t, output of 5 EU/t, and has an internal storage of 1,000,000 EU.

Lapotronic Storage Unit can store 2 billions EU on full capacity, and is modular(1million per LESU block) but needs lots of lapis-mining slaves working 24/7 for weeks (seriously, its a metric shitton (144.004 lapis to be exact(and 2001 circuits, but barely anything else))) (almost forgot: is is also extremely huge (2k blocks(20x10x10 cube (i ...

I was wondering how I can Automate my Combustion Engine & Lapotronic Supercapacitor. Normally I would use two energy detection covers on the storage and an RS Latch to Start/Stop the Engine. The problem is that I can only place one functional energy detection cover on the LSC (bottom), because I cannot connect redstone to the sides or the top ...

The LESU-Block allows you to expand the storage and output capacity of a Lapotronic Energy Storage Unit. Each LESU-Block increases the EU output of the LESU by 1EU/t and the maximum storage by 1 million EU. The maximum amount of energy that a single LESU can store is 2 billion with extra energy...

If you use the Adjustable Energystorage unit, set it to 2048EU/t, place a HV Transformer at its outputface, that

brings 2048 EU/t down to 4 512EU packets so glassfiber can handle it. Glass fiber can, as any other cable in IC2/Gregtech btw, carry a unlimited amount of EU/tick, but only up to 512 EU/packet, so you need a HV Transformer to ...

A Lapotron Crystal is the fourth tier of portable energy storage added by Tech Reborn. It has a high energy storage capacity, capable of storing 10M Energy. ... Usage. Lapotron Crystals are used as crafting ingredient in the following crafting recipes: Lapotronic Energy Orb. MFSU. Energy Flow Chip. Nanosaber. Quantum Boots. Quantum Chestplate ...

The Lapotronic Energy Storage Unit allows you to store a variable amount of EU between 1 million and 2 billion. This amount can be increased by adding LESU-Blocks from a structure of ...

The Lapotronic Energy Orb Cluster is a Battery added by GregTech 5 Unofficial, capable of storing 1 billion Energy Units (EU). It is considered a LuV Battery (32,768EU/t). ... Energy; Energy storage: 1,000,000,000 EU:

The Lapotron Crystal Upgrade is an upgrade added by GregTech 4. When applied, it will add 10,000,000 Energy Units to the machine's internal storage. The Lapotron Crystal Upgrade can be used in place of the Lapotron Crystal in many recipes. Upgrades are applied by right-clicking a machine, and cannot be removed, even with a Wrench.

A Lapotronic Energy Orb is the highest tier of portable energy storage added by Tech Reborn. It has the highest energy storage capacity, capable of storing 100M Energy. Sneak-Use Lapotronic Energy Orb to make it active. It will charge other items in inventory while active.

The Lapotronic Energy Orb is a portable battery used to charge items. For more details and how to use, read general information about Batteries. Tier I/O Rate Storage ; Insane : 8192 E/t : 100 mE : Recipe. Usage. Used as an ingredient in the Crafting Table to produce: Cloaking Device. Lapotronic Orbpac. AESU.

If you use the Adjustable Energystorage unit, set it to 2048EU/t, place a HV Transformer at its outputface, that brings 2048 EU/t down to 4 512EU packets so glassfiber can handle it. Glass ...
