

The Gambia Sustainable Energy Sector Program - With a budget of Euro 136 million from the European Investment Bank, World Bank and others, this project began in 2018 and seeks to restore and modernize the energy transmission grid, install on-grid solar Photovoltaic (PV) units and off-grid PV units for health facilities and public schools in ...

Clean Energy: Produces 23MW of clean solar power, reducing greenhouse gas emissions and contributing to environmental protection. Energy Security: Increases energy independence and strengthens the stability and reliability of The Gambia's power grid.

The Government of the Gambia through the Ministry of Petroleum and Energy (MoPE) and the National Water and Electricity Company (NAWEC) has benefitted from World Bank's support to develop a 50 MWp Regional Solar Project on a site with excellent solar irradiation in Soma - Lower River Region, The Gambia.

The Gambia entered a new era of energy development in April 2023 with the inauguration of its first large-scale solar energy facility in Jambur. Built by Chinese manufacturer Tebian Electric Apparatus, the 23 MW solar plant - equipped with an 8 MW electricity storage system - serves to reduce the country's reliance on imported fossil fuels.

The Gambia Investment & Export Promotion Agency (GIEPA) is the national agency established by an Act of Parliament in July 2010 responsible for ...

Gambia's Ministry of Petroleum and Energy (MoPE) and state-owned utility Nawec have jointly launched a tender for the construction of a 50 MW PV plant in Soma, south of the River Gambia.

The Gambia Sustainable Energy Sector Program - With a budget of Euro 136 million from the European Investment Bank, World Bank and others, this project began in 2018 and seeks to restore and modernize the energy transmission ...

The Gambia through the National Development Plan seeks to increase its share of Renewable Energy from 2% to 40% and encourage private sector participation to provide 24/7 access to electricity to all Gambians. For this reason, The Gambia has introduced the following measures to attract foreign investments: Through the Renewable

Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase Gambia's current generation

capacity of 98 MW and enable electrification of rural areas.
