

Is Lithuania a net energy importer?

Lithuania is a net energy importer. In 2019 Lithuania used around 11.4 TWh of electricity after producing just 3.6 TWh. Systematic diversification of energy imports and resources is Lithuania's key energy strategy. Long-term aims were defined in the National Energy Independence strategy in 2012 by Lietuvos Seimas.

Why is Lithuania investing in alternative energy import routes?

This is because ever since the reestablishment of its independence, Lithuania has been investing in alternative energy import routes. These included the development of the Butinge oil terminal, the electricity interconnections NordBalt and LitPol Link, the Klaipeda LNG terminal and the Gas Interconnection Poland-Lithuania.

Is Lithuania ready for natural gas independence?

Taking one of the first bold steps towards natural gas independence in terms of infrastructure, in 2014, Lithuania launched a liquified natural gas (LNG) terminal in the port of Klaipeda with a floating storage and regasification unit named Independence at the core.

Is Lithuania a good country for solar energy?

Lithuania has been significantly expanding its solar parks, growing from zero in early 2000s to 814 MW capacity in 2022. Lithuania is a net energy importer. In 2019 Lithuania used around 11.4 TWh of electricity after producing just 3.6 TWh. Systematic diversification of energy imports and resources is Lithuania's key energy strategy.

Will Lithuania achieve a climate-neutral energy sector?

Lithuania closed the Ignalina Nuclear Power Plant in 2009 and currently operates synchronously with the Russia-Belarus power system, though a de-synch is planned in early 2025. To achieve a climate-neutral energy sector, Lithuania will have to more than triple the amount of renewable energy generated.

Which power plant provides energy storage in Lithuania?

Kruonis Pumped Storage Plant provides energy storage, averaging electrical demand throughout the day. The pumped storage plant has a capacity of 900 MW (4 units, 225 MW each). Kaunas Hydroelectric Power Plant has 100 MW of capacity and supplies about 3% of the electrical demand in Lithuania.
