

Who is CS Energy?

CS Energy is a leader in providing customised energy solutions for Queensland's large organisations. We are committed to understanding the energy requirements of our customers and thrive on providing energy solutions that are as unique and different as they are. We're diversifying into renewable energy, batteries and hydrogen.

How much electricity does Madagascar have?

In Madagascar, only 15% of the population has access to electricity. In 2017, the country had just 570 MW of mainly thermal (60%) and hydroelectric (40%) installed production capacity. Furthermore, only 60% of this energy is truly available owing to poor maintenance of power plants.

Is Madagascar ready for solar power?

With all regions of Madagascar enjoying over 2,800 hours of sunlight per year, the Grande Ile is the perfect location for development of solar power, with a potential capacity of 2,000 kWh/m<sup>2</sup>/year. The Government is counting on this potential to fulfill its objective of providing energy access to 70% of Malagasy households by 2030.

Who are CS Energy & Aula energy?

CEOs Darren Busine and Chad Hymas signed a Deed of Assignment to signpost the partnership between CS Energy and Aula Energy, who are developing the project in a joint venture. The Boulder Creek Wind Farm will be located approximately 40 km south-west of Rockhampton on the ranges between Mount Morgan and Westwood.

Does CS Energy own a power station?

The company's generation portfolio comprises coal-fired power stations, energy storage and renewable energy offtakes. CS Energy has a trading portfolio of 3,535 megawatts in Australia's national electricity market. The company owns and operates Kogan Creek Power Station and Callide B Power Station.
