

Madagascar generators for home backup power

What is the best generator for backup power?

The ultimate generator for backup power is a whole-home generator. They're expensive, but if you can afford one, they're highly convenient. My favorite is the Generac Guardian series. The line has a wide range of power levels, they all come with wi-fi connectivity, and they're well-designed for permanent outdoor installation.

Do you need a backup power generator?

Proper home maintenance is all about planning and preparation. Given the uptick in extreme weather, that may mean investing in a backup power generator to keep your home running in the event of disaster or an extended power outage.

How does a backup power generator work?

Backup power generators provide electricity to the home with the use of two main components: a gas- or battery-powered engine that turns an on-board alternator to generate alternating current (AC) electrical power.

Can a solar generator be used as a backup power source?

Solar generators work well as a home backup power source. Your solar panels keep the generator powered, so there's no need to purchase fuel. You can store them inside, and they're often relatively compact. And they're better for the environment than a gas generator.

What generators do you need for a power outage?

A one-time roofer and a serial remodeler, Dan can often be found keeping house at his restored Brooklyn brownstone, where he lives with his wife and kids. During a power outage, a reliable generator from a leading brand like Generac, Kohler and Craftsman will keep your home running and loved ones safe.

How much power does a Generac generator produce?

If you want the most power, you can get out of a portable generator, Generac has an 18,000-watt model that's the best we've seen. In fact, PTR Editor-in-Chief Clint DeBoer specifically got this for his home as an alternative to a permanent install whole-home generator. While this model produces a ton of power, it's heavy and thirsty.
