In antiquity, Sri Lanka was known to travellers by a variety of names. According to the Mahavamsa, the legendary Prince Vijaya named the island Tambapanni ('copper-red hands' or 'copper-red earth'), because his followers' hands were reddened by the red soil of the area where he landed. [21] [22] In Hindu mythology, the term Lanka ('Island') appears but it is unknown ...

The waters are often a rusty red due to heavy loads of suspended sediment. Upon meeting the president of Madagascar, one astronaut is said to have joked: "Oh, yes, I know your country. It is the one bleeding into the ocean." Satellites regularly capture images of Madagascar's sediment-laden rivers as well.

Madagascar's Famine is the First in Modern History to be Solely Caused by Global Warming. Accessed July 30, 2021. Madagascar currently generates around half of the energy it needs from hydropower, whereas solar still only plays a minor role. However, the huge potential it has for exploiting renewable energy could allow Madagascar to ...

Since 1950, around 40% of Madagascar's forest cover has been destroyed by wildfires, agricultural grazing and "slash and burn" clearances, according to NASA's Earth Observatory.

Red scars disfigure the earth where topsoil has eroded; in places, as if ripped into by colossal machines, entire mountainsides have fallen away. The long-horned cattle known as zebu--­indigenous to South Asia, like the island's first human ­inhabitants--graze across the plains, treading between bright green rice paddies.
