

Does albioma have a power plant in Martinique?

Against the backdrop of the energy transition, this new facility, Galion 2, covers approximately 15% of the island's power needs, while also enabling the share of intermittent energy sources such as solar power to be increased. Alongside the Group's thermal biomass activity, Albioma operates a fleet of photovoltaic power plants in Martinique.

How much energy does Martiniquan generate?

In 2018, these installations supplied 17.6 GWh of renewable electricity to the Martiniquan network, representing nearly one quarter of all photovoltaic power generated on the island. As well as contributing to the regional energy transition, this output is set to increase by around 500 kWp in 2019, as new projects come onstream.

What is albioma doing in Martinique?

Since 2007, Albioma's thermal biomass and photovoltaic businesses have been enhancing the energy independence of Martinique, which is not connected to mainland electrical networks. In Martinique, Albioma has built, commissioned and is now operating the Galion combustion turbine and the first all-biomass thermal power plant in Overseas France.

The Galion solar power plant is located in Trinité, to the north of Martinique, on the roof of the island's only sugar refinery. It is located in the immediate vicinity of Galion 2, the 100% biomass power plant operated by Albioma since 2018, and has an installed capacity of 420 KWp.

En Martinique, Albioma a construit, mis en service et exploite aujourd'hui la turbine à combustion du Galion et la première centrale thermique 100 % biomasse d'Outre-mer. Cette nouvelle installation, appelée Galion 2, permet ...

As a trusted solar panel company in Martinique, we manufacture and supply premium-grade solar panels that harness the power of the sun to generate clean and sustainable energy. Our ...

En Martinique, Albioma a construit, mis en service et exploite aujourd'hui la turbine à combustion du Galion et la première centrale thermique 100 % biomasse d'Outre-mer. Cette nouvelle installation, appelée Galion 2, permet de couvrir environ 18 % des besoins électriques de l'île et rend aussi possible, dans un contexte de ...

Martinique boasts of a fleet of solar power plants that supply clean energy to its grid. The most recent statistics show that the Island's installed solar capacity stood at 65 Megawatts at the end of 2018.
