

How big is the global microgrid market in 2021?

In 2021, the global microgrid market surpassed 14.3 billion U.S. dollars, a year-over-year growth of 13 percent. The market is forecast to grow at a compound annual growth rate (CAGR) of 17.9 percent between 2022 and 2028, to reach 43.9 billion dollars in the latter year. Get notified via email when this statistic is updated.

What are the key factors affecting the microgrid market?

The microgrid market is expected to have a robust growth during the forecast period, primarily due to two main factors, i.e., the global demand for clean energy generation and a self-sufficient source of power generation in times of crisis or grid disconnection.

Which region will dominate the microgrid market during the forecast period?

The Asia-Pacific region is expected to dominate the market during the forecast period due to a high rate of electrification, mainly for rural or semi-urban areas. This section covers the major market trends shaping the Microgrid Market according to our research experts:

What are the opportunities for the microgrid market?

The innovation-oriented endeavors and the funding feasibility studies in many countries are the biggest opportunities for the microgrid market. Apart from independent power generation, microgrids have evolved with high-speed control platforms and forecasting systems that make them more sophisticated.

How can microgrids boost business statistics?

Rising integration of renewable energy sources coupled with supportive government policies to encourage the deployment of microgrids through streamlined permitting processes, grid interconnection standards, and financial incentives will stimulate the business statistics.

Why are key market players investing in Microgrid technology?

Key market players are heavily investing in research and development to innovate and improve microgrid technologies including advancements in energy storage systems, smart grid technologies, and integration of renewable energy sources.

The microgrid market size exceeded USD 17.8 Billion in 2023 and is poised to showcase around 20.5% CAGR from 2024 to 2032, driven by the rising energy resilience and reliability coupled ...

Estimates show that to achieve universal access to electricity by 2030, 40 percent of all installed capacity will have to come from mini grids. At present the total mini grid investment in countries with low levels of electricity access in Africa and ...

In 2023, the Microgrid Market size was estimated at USD 13.37 billion. The report covers the Microgrid

Market historical market size for years: 2020, 2021, 2022 and 2023. The report also forecasts the Microgrid Market size for years: 2024, ...

The global microgrid market size was valued at USD 9.88 billion in 2023 and is projected to grow from USD 11.24 billion in 2024 to USD 37.35 billion by 2032, exhibiting a CAGR of 16.19% during the forecast period. Asia ...

This paper presents a review of the microgrid concept, classification and control strategies. Besides, various prospective issues and challenges of microgrid implementation are highlighted and...

In this paper, a comprehensive statistics-based review of islanding detection methods (IDMs) in microgrids (MGs) is presented. Islanding detection is the situation of isolating the MG from the ...

The China microgrid market is projected to surpass USD 25.3 billion by 2032 is diverse and expansive, with several countries actively investing in microgrid development. The advancing ...

Phase II will use the results of Phase I to have an initial indication of the costs that might be driving the cost of development the most. Cost information for 80 microgrids was collected ...
