ThinkEco's modlet records minute-level power use and provides socket-level control for any plug load. Our smartAC provides additional temperature measurement and control. These devices provide a retrofit solution for utilities to curtail any residential or commercial plug load from 110V-220V and 15-20A. Hardware Web & Mobile Apps

Now plug the ThinkEco Gateway into the outlet closest to your router. Once the Gateway has power the lights will come on and the gateway will automatically connect to the modlets in your home. Plug In Your Modlet BN(s) Great, you're halfway there! Now pick a Modlet BN to plug in. If you have multiple, choose one to start. ...

The Modlet from ThinkEco is a smart outlet that reduces energy waste by monitoring real-time equipment power consumption and creating an automated savings program. Plug the modlet into an existing wall outlet and then plug appliances into it. The wireless software automatically creates an energy-savings plan, turning off appliances when not in use.

Constantin Borosan, State Secretary of the Ministry of Energy, recently announced that the Republic of Moldova will achieve independence from the Cuciurgan Power Plant, controlled by the unrecognised authorities in Transnistria, starting in 2025. This will be possible following the commissioning of the Vulcanesti-Chisinau power line next year.

MESA provides policy, infrastructure and science-based solutions to help Moldova power homes and businesses. Under MESA, states Tetra Tech, connecting Moldova's electricity system to the European grid was an important first step to catalyse a regional electricity market and support competitive procurement of cleaner energy.
