PowerSafe SBS EON Technology(TM) batteries have been developed to provide high cycling and fast recharge performance in applications where the power supply is erratic. SBS-C11 Battery Features and Benefits: Proven Long Service; High energy density; Up to two year shelf life; Very low ventilation requirement

PowerSafe SBS batteries are designed with EnerSys" proprietary thin plate pure lead technology (TPPL). Batteries utilizing this advanced technology have better energy density, better resistance to heat and lower internal resistance to support higher rate charging and discharging.

Manufactured to the highest international standards, PowerSafe® SBS batteries offer outstanding performance in both float and cyclic applications. The high energy density of these batteries makes them ideal for system upgrades or reduced installation footprint, while still delivering dependable backup protection.
