

Soluna Technologies Ltd, a newly-founded blockchain computing company backed by US private equity firm Brookstone Partners, plans to develop a 900-MW wind project in Morocco. ... The purpose of the new company is to build computing centers ...

British energy firm Sound Energy announced that its micro-liquefied natural gas (LNG) project at the Tendirra production concession in Morocco will generate its first revenues in early 2024 ...

Wind-powered renewable energy: Soluna's flagship site covers 37,000-acres in southern Morocco with over 900 Megawatts of wind power potential. It is a Class I wind site, where wind speeds reach ...

Who is Soluna. Founded in 2018, Soluna develops vertically-integrated, utility-scale projects that combine its own renewable energy power plants with dispatchable computing facilities focused on cryptocurrency mining and cutting-edge blockchain applications. Soluna's flagship project, Harmattan, is a 900 MW wind site located in Morocco.

It's believed that by 2050, more than 20 percent of renewable energy will be lost to curtailment. Enter Soluna, which seeks to build specialized data centers designed to act as a battery to help absorb the influx of energy. "We're about making renewable energy the world's primary source of power," Belizaire says.
