Will China build Namibia's largest solar power plant?

Namibia's state-owned power utility NamPower on Monday said it had signed a contract with two Chinese firms to start building the country's largest solar power plant.

How much electricity does Namibia generate per kWp?

Due to the constantly high irradiation, PV systems in Namibia generate twice as much electricity as comparable systems in Germany on an annual average. A daily yield of up to >5.6 kWh can be expected per kWp of installed PV capacity. In comparison, natural conditions for wind power are limited in the region.

Who owns the electricity market in Namibia?

Traditionally, the Namibian electricity market has been dominated by the state-owned utility Namibia Power Corporation (Pty) Ltd., or NamPower for short. In the Namibian electricity market, NamPower was responsible for generation, transmission, distribution and the trading of electricity as well as supplying the end customer.

Will Rosh Pinah be the largest solar park in Namibia?

It will be the largest solar park in the nation once it is operational. Rosh Pinah is a mining town in the southern part of the country. "The site lies near the existing Namibian power grid and will thus avoid additional investment costs for new transmission or other enabling infrastructure," the company explained.

What does NamPower do in the Namibian electricity market?

In the Namibian electricity market, NamPower was responsible for generation, transmission, distribution and the trading of electricity as well as supplying the end customer. For some years now, the Namibian government has been attempting to liberalise the market with a view to creating

The Power Plant Manager is the integrated solution for reliable monitoring, control and grid-compatible power control for all megawatt-range PV power plants with central or string inverters.
