

Who is responsible for the energy sector in Togo?

Another important player in the energy sector is the Togolese Agency for Rural Electrification and Renewable Energies(AT2ER),a public institution,with financial autonomy. The agency is in charge of implementing the country's rural electrification policy,promoting and developing renewable energies.

What is Togo's energy strategy?

The electrification technologies and business model of Togo. The national Power grid, mini-grids for PPP and solar home systems (SHS) The national strategy is based on the most cost-effective approach for identify the technologies to be deployed on the territory.

Will Togo achieve 100% electricity coverage by 2030?

In its first phase,the project should reach 33,000 households. Togo hopes to achieve 100% electricity coverage by 2030,against 59% now. By then,the share of renewables in the energy mix should be 50%,according

Does Togo have a potential for wind energy?

Togo's potential for wind energy is not high. Our study also identified a number of challenges with renewable energy,however. For example,the Togolese government needs to determine the generation potential from various renewable energy sources. The head of a renewable energy research centre said:

What are energy systems in Togo?

Energy systems in many countries, including Togo, are a balance between energy that's generated centrally at a large scale and energy that's generated at a smaller scale closer to where it's used. Balancing the two sources makes energy supply more reliable and stable.

What is the main source of energy in Togo?

Presently,the main source of energy in Togo is electricity. The rate of access to electricity in Togo is increasing (from 17% in 2000 to 45% in 2018),but with large differences between urban (access rate = 88.8%) and rural areas (access rate = 8%) (Energypedia 2020).

Sustainable energy investment unlocks a multitude of benefits and addresses a broad range of Government priorities. Society benefits from reduced energy costs and emissions and increased national energy security. Homes and buildings are warmer with improved air quality. Health outcomes improve with reductions in national and private health costs.
