

Will New York City's largest battery storage facility replace a natural gas peaker?

New York City's largest battery storage facility will replace a natural gas peaker plant unit retiring in 2025.

What is the pilot cities programme?

Pilot Cities test and implement innovative approaches to rapid decarbonisation over a two-year programme. The Pilot Cities Programme supports European cities to test and implement innovative approaches to rapid decarbonisation, working across thematic areas and functional silos in support of systemic transformation.

What is the NetZeroCities Pilot Cities Programme?

This article is part of a series exploring the NetZeroCities Pilot Cities Programme, which includes Multi-City Pilot Cities, and integrates non-Mission Cities communities across the EU. Currently, a new Call for Pilot Cities is open, marking the next phase of exchange underpinning the ambition of the Cities Mission.

What is a pilot city?

As part of their pilot activities, Pilot Cities will work on acquiring and testing capabilities necessary to ensure the sustainability and the replication of these activities, as well as a better, practical understanding of the concept of the Investment Plan. Why is this relevant to NZC and the Pilot Cities Call?

How are pilot cities paving the way for a climate-proof future?

53 Pilot Cities in 21 countries are testing and implementing innovative solutions to rapidly and drastically reducing their emissions, paving the way for a climate-proof future in European cities. A clear set of innovative solutions ready to be implemented, scaled and/or replicated will be identified by the end of the pilot.

What is the pilot cities guidebook?

The Pilot Cities Guidebook is a deliverable under Work Package 4 (WP4) of the NetZeroCities (NZC) project, that covers the design and implementation of a Pilot Cities Programme via an open Call for proposals and subsequent granting programme.

New York City's first-ever vehicle-to-grid (V2G) pilot project is entering a second stage of development, following a successful start to its operational life. Part of the tenth cohort of the Wells Fargo Innovation ...

1 ??&#0183; The Pilot BESS will complement our recently established 122kW solar array and planned new 430kW solar array due to be built in 2025. CentrePort Chief Executive, Anthony Delaney, ...

1 ??&#0183; CentrePort will be installing a pilot scale 1000kWhr / 500kW BESS facility to address current operational challenges and meet the near-term needs of electrification initiatives. The Pilot BESS will complement our recently ...

The results of Liberty Utilities' residential battery program could help determine how the state deploys the technology. A New Hampshire utility has begun installing batteries ...

The NetZeroCities Pilot Cities Programme is a critical part of bringing the Cities Mission forward - putting the testing of new approaches to climate neutrality at the forefront, and connecting cities along the way.

Developing new energy is critical to China's green and low-carbon development. Therefore, in 2014, the Chinese government promulgated a vital innovation policy, namely, the New Energy Demonstration City Policy ...

After the presentations, guests had the opportunity to network, ask questions about, and discuss future energy storage pilot initiatives. As the culmination of two years of Resilient Energy ...

A Pilot City focuses on "whole-district" energy transition, connecting built environment with energy systems through the exploration of new financial instruments, urban planning policies and digitally enhanced governance models.

Cities are the epicenters of energy consumption [10]. Occupying less than 1 % of the Earth's surface, they consume 76 % of global coal, 63 % of oil, and 82 % of natural gas [11] China, ...
