Off grid photovoltaic systems are completely independent of the grid. The energy produced by the solar panels are collected and stored in special batteries that are rechargeable. A device called a charge controller regulates the raw DC power to prevent overcharging and protect the batteries.

Of course, you will find that several persons who use solar energy in Jamaica also operate off-grid. Others also use solar-powered appliances and devices such as solar water heaters (one of the first uses of solar energy in Jamaica, coming with newer NHT houses), phone chargers, light bulbs, fans, etc.

Solar Connections Jamaica Ltd. offers solar power consulting and systems installations in Jamaica Islands. We provide services to commercial and residential projects, including CORE program and off-grid solar systems, and solar heating solutions for water (laundry, bathing, swimming pools, etc.).

**Off-Grid System** The Off-Grid System uses batteries to store the electricity created when the energy from the sun is converted in the Solar Panel System. The batteries enable the energy from the system to be used at nights and or periods of no or very low sunlight.
