

Does Palau have a renewable power system?

The results of the optimisation show that Palau's current power system is dominated by diesel generation, with renewable energy only taking a small share (just 4%). With more deployment, however, the share taken by renewables could potentially increase to more than 92%. This corresponds to the lowest average system LCOE.

Can Palau achieve a fully decarbonised power system?

This report looks in detail at Palau's current power sector and provides a pathway for achieving a fully decarbonised, least-cost power system, with intermediate milestones.

How to protect Palau's energy supply?

Finding the right balance is an ongoing task involving government, producers and users of energy. The government believes a combination of competitive markets with backstop measures and effective regulation of suppliers is the best means of protecting the security of Palau's energy supplies.

When did Palau launch its first solar and battery energy storage system?

Palau on June 3 launched its first solar and battery energy storage system (BESS) project on Friday. The project was made possible by Renewable company Alternergy Holdings Corp. and its subsidiary Solar Pacific Energy Corporation.

How much gas does a boat use in Palau?

They represent one of Palau's key tourist attractions, with numerous visitors travelling every year for diving and snorkelling. According to information provided by PEA, an average 38 foot open boat with a 250 horsepower twin engine consumes approximately 40 gallons of gasoline when travelling back and forth to the Rock Islands.
