

Why should you choose Atrius?

Reduce energy, embrace sustainability, unlock efficiency, and enhance experiences. Atrius transforms your building into an intelligent, responsive environment that benefits owners, operators, and occupants.

How can Atrius' energy help Weber State save money?

Automatically normalize data against weather or occupancy changes to compare building performance across locations. "Weber State has saved over \$2.3 million since 2020 using Atrius' Energy to identify,scope,and verify energy projects." Encourage occupants to reduce energy consumption by sharing dynamic storyboards across public screens.

What is Atrius & how does it work?

Atrius offers an extensive suite of apps that turn outdated buildings into intelligent spaces and reshape how people experience them. Enable your buildings to sense, think, and act. Part of the Intelligent Spaces Group at Acuity Brands.

How can Atrius help reduce energy consumption?

Encourage occupants to reduce energy consumption by sharing dynamic storyboards across public screens. "Atrius makes energy and emissions data readily accessible to faculty,students,and consultants who appreciate the intuitive,user-friendly format." Ready for a deeper dive?

What is Panama's power system like in 2017?

In 2017,Panama's power system had very large installed hydropower capacity(54% of total capacity) and substantial VRE capacity (45.3%). The generation breakdown was 64% renewable energy (36% run-of-river hydro,18% reservoir hydro,8% wind,2% solar photovoltaics (PV)) and 36% thermal generation (29% oil and 7% coal).

How much electricity does Panama need?

At the same time, electricity demand in the country has continued to increase, reaching a peak demand of over 1 600 megawatts (MW) in 2015. To meet this growth, Panama introduced wind and solar photovoltaic (PV) energy in 2013, which reached 270 MW and 90 MW of installed capacity by 2016, respectively.

Share your energy reduction and sustainability goals. Display live building performance data on any public smart device. Motivate stakeholders and occupants to achieve shared sustainability goals. Showcase your space's unique green features and certifications like LEED with corresponding resource utilization data

Atrius Building Insights, our multipurpose energy tool is now Atrius Energy, our real-time utility monitoring and measuring tool that helps system integrators and facility managers get a deep understanding of exactly how their energy is being used, down to the point level. When combined with our energy optimization

recommendations, Atrius ...

Panamá busca convertirse en un país con emisiones neutras de carbono de aquí a 2050, al enfatizar, en parte, la restauración forestal a fin de absorber las emisiones de CO2. El programa Panamá sostenible: Reduce tu Huella abarca todos los ministerios gubernamentales, el Canal de Panamá, la logística, la construcción, la forestación, la agricultura, el turismo, la academia y el ...

En este contexto, Erco Energy anuncia que será el primer actor en Colombia en implementar proyectos con baterías para el almacenamiento de energía solar a gran escala. Estas baterías se instalarán inicialmente en los proyectos de la marca, comenzando por "La Martina", situado en el municipio de Paratebueno, entre Cundinamarca y Meta.

En NEO ENERGY, nuestra pasión y compromiso radican en brindar a nuestros clientes soluciones de eficiencia energética y energía solar renovable de vanguardia. 6 años de experiencia. En donde hemos enfocado nuestro éxito en poner a los clientes en el centro de todo lo que hacemos.

Every year we conduct a field survey in partnership with Smart Energy Decisions, where hundreds of energy, facility, and sustainability leaders from various organizations weigh in on their experiences over the past year and reflect on the current state of the energy management industry as a whole.. This year our research unveiled a continuing ...

Panama: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
