

Who makes solar panels?

The Israeli solar energy company Apollo Power that developed technology turning surfaces into an energy source using the sun's rays, and is deployed by e-commerce giant Amazon and German car manufacturer Volkswagen, has opened a flagship factory for the mass production of solar panels, which it says is the first of its kind in the world.

What is Apollo Panda?

Apollo develops and manufactures groundbreaking solutions and products in solar energy, destined to transform any surface under the sun into an electricity source. Apollo Panda is specifically designed to fit any lightweight structure with load limits or curved surfaces.

When will solar panels be incorporated into Volkswagen cars?

The solar energy films are expected to be incorporated into Volkswagen vehicle models starting from July 2024. Additionally, the company is collaborating with German car manufacturer Audi to integrate flexible and lightweight solar panels into the materials that make up the roof of its electric vehicles.

How much does a solar panel weigh?

The solar panels are made for surfaces such as on cars, trucks, roofs and aircraft, that cannot support the weight of glass solar panels. The size of the basic unit of the solar film is 12 square meters and weighs 3 kilograms per square meter.
