Although the required size of a system depends on many factors, the majority of homes in New Zealand can be powered with a 5 kW solar system, making it one of the most common system sizes. Therefore, we decided to break down all the aspects of a 5 kW system, including its cost, number of panels, energy production, etc.

New Zealand has abundant sunshine and generates between 1,700 and 2,100 sunshine hours annually. Some areas, like Nelson and Gisborne, receive as much as 2,400. Solar Panels don't require sunshine; they require daylight, so Solar Panels work year-round, even in ...

Typically, the average New Zealand home is equipped with a 5kW solar system, consisting of 11 to 12 solar panels. Smaller systems usually start at 3kW (around 7 panels), while larger setups, like an 18kW system (approximately 40 panels), are becoming increasingly common.
