

Standalone energy storage become eligible for the clean energy investment tax credit (ITC) at the start of last year as part of the Inflation Reduction Act. Scatter Wash will come online in April 2025 and provide power ...

Strata Clean Energy of Durham, North Carolina, is in the early stages of developing a standalone battery storage project in north Phoenix, near Deer Valley Airport. The company is actually working on two projects -- called Deer Valley and Scatter Wash -- which are near each other and collectively known as Scatter Wash Energy Storage.

Scatter Wash will provide APS customers with reliable energy, support increased power demand, and store significant amounts of renewable energy from solar power plants on its grid to use ...

The development of Scatter Wash is being supported by the Investment Tax Credit (ITC) for standalone power storage created under the Inflation Reduction Act--passed by the Biden administration in 2022. Strata, headquartered in Durham, North Carolina, has a portfolio of more than 270 completed solar and energy storage projects.

Strata Clean Energy (Strata), a pioneer in grid-scale renewable energy solutions, celebrated a major milestone for its Scatter Wash battery storage complex in Phoenix, Ariz., with a groundbreaking that included executives from Strata, along with representatives from Arizona Public Service (APS), and other local dignitaries. The 255 MW / 1,020 MWh facility is expected ...

Strata Clean Energy, a renewable energy developer, has begun construction on its 255MW/1.02 gigawatt hours (GWh) Scatter Wash battery storage complex in Phoenix, Arizona, US. Set to be operational by April 2025, ...

The Scatter Wash project is expected to provide customers with reliable energy, support increased power demand, and store renewable energy from solar power plants on its grid. Also, the battery storage facility will provide ...

Strata Clean Energy as managed to secure a total of \$559 million funding that would be utilized for the development of its 255MW/1,020 Mwh Scatter Wash Battery Storage complex. Strata kicked off construction works on the Phoenix, AZ, energy storage project in the month of January this year. This mega battery complex project is expected to kick off its ...

Rogol added that Strata would look at using the ITC to finance its comparatively larger 1GWh project in Arizona, Scatter Wash, ... The Energy Storage Summit USA is the only place where you are guaranteed to meet all the most important investors, developers, IPPs, RTOs and ISOs, policymakers, utilities, energy

buyers, service providers ...

US-based Strata Clean Energy, the grid-scale renewable energy solutions company, initiated the works for its Scatter Wash battery storage complex in Phoenix, Arizona. The 255 MW / 1,020 MWh facility is expected to become operational in April 2025. The project's batteries can store enough electricity to power more than 250,000 homes for 4 hours ...

Arizona Public Service and Strata Clean Energy announced a 20-year tolling agreement built around the 255-MW/1-GWh Scatter Wash battery storage complex in Phoenix. The deal with Strata is part of APS' long-known move toward more than 1 GW of complementary and connected solar and battery storage to decarbonize its generation portfolio.

Strata Clean Energy marks a milestone with the groundbreaking of Scatter Wash battery storage in Phoenix. The 255 MW complex, operational by April 2025, will store electricity for 250,000 homes daily for 20 years.

Strata Clean Energy, a grid-scale renewable energy solutions provider, broke ground on its 255 MW Scatter Wash battery storage complex in Phoenix, Arizona. Once operational in April 2025, the project's batteries will store enough electricity to power over 250,000 homes for 4 hours daily for 20 years.

The development of Scatter Wash is supported by the Investment Tax Credit (ITC) for standalone energy storage created by the Inflation Reduction Act of 2022. It is among the critical projects that help demonstrate the benefits of national sustainable energy incentives in bringing the energy transition to reality.

Developer Strata Clean Energy plans to spend \$450M to create a 400MW/1,600 megawatt hours-capable battery storage site that would house enough energy to power at least 350,000 homes for one hour. The site is ...

Strata Clean Energy, a key player in utility-scale solar and storage systems, has officially broken ground on Scatter Wash, a groundbreaking 255 MW / 1,020 MWh battery storage complex located in Phoenix, Arizona. The project, set to go live in April 2025, will play a pivotal role in meeting the surging energy demands of Arizona Public Service (APS) customers.
