This means that millions of our customers can enjoy the benefits of solar energy without needing to pay everything upfront. **How It Works.** Through our partnership with Zopa, you can now split the cost of solar panels into manageable monthly payments over 3, 5 and 7 years. This makes it easier than ever to go green, even if you can't cover the ...

Now, the solar power used directly in your home to power lights, A/C, etc. still has full value since it's replacing electricity you would have bought from your utility during the day, but the excess power you push onto the grid is only worth around 25% of the power you are buying from the grid when the sun goes down and your solar panels ...

One of the most common misconceptions about solar is that people who install panels no longer receive an electricity bill from their utility company. This isn't true in most cases: most solar panel systems in the U.S. are grid-tied, allowing customers to draw electricity from the grid when their solar panels aren't producing enough electricity.
