

Polish utility PGE Group has launched a tender for the design and construction of a battery storage facility with a minimum capacity of at least 900 MWh. Meanwhile, Ukraine's DTEK has completed the acquisition of a 532 MWh battery storage project in southern Poland.

OX2's Maevaara 104MW wind farm, in Sweden. Image: OX2. Executives from Sweden-based developer OX2 discussed its diversification from wind and solar into storage with Energy-Storage.news, with Poland a big part of that move.. The company is among the largest wind power developers in Europe, particularly onshore, and started diversifying into solar PV ...

Polish state-owned energy company PGE Group announced a tender for the construction of a battery energy storage facility in Zarnowiec, which is likely to become the nation's largest once completed.

DTEK's renewable energy division DRI has concluded the purchase of a 133MW battery storage project in Trzebinia, Poland from Columbus Energy. The acquisition aligns with DRI's strategic goal to develop up to 1GW of renewable energy and storage capacity in Poland by 2030.

In the auction held by Polskie Sieci Elektroenergetyczne (PSE), Poland's transmission grid operator, Greenvolt Power participated with six independent energy storage projects, totalling grid-secured capacity of 1.4 GW, achieving 1.2 GW of awarded long-term capacity payments.

Poland has concluded its 2028 capacity market auction, awarding around 1.7GW of contracts to battery storage projects. ... (IPP) Greenvolt won 1.2GW of 17-year contracts for six battery energy storage ...

If the proposed derating factor takes effect, a 100 MW battery energy storage system would only secure a 57 MW capacity agreement, resulting in a lower price for providing power services. This policy is part of the Polish Ministry of Climate and Environment's efforts to promote energy transition and sustainable development.

Energy storage developer Pacific Green has agreed to acquire two large-scale in-development battery energy storage system (BESS) projects in Poland, Europe. The acquisition of two 50MW projects totalling 400MWh of capacity marks the developer's first entry into Poland, which is fast becoming a key market for energy storage in the Central and ...

A 20 MW lithium-ion battery storage facility in Landskrona in the south of the country will be operational at the beginning of 2024. Work is also underway on one of the largest storage facilities in Sweden, to be built in Filipstad, 300 km west of Stockholm.

BATTERY FORUM Poland is an event where industry leaders will present the latest technologies and innovative solutions in the energy storage industry. The industry congress, an integral part of the fair, allows participants to update ...

A 61% factor means a 100MW battery energy storage system (BESS) will only be able to bid in 61MW. Capacity markets are a growing area for energy storage to play in, with 23GW of projects awarded auctions across Europe, said panel moderator Joanna Spirodek, BESS integrator Fluence's EMEA marketing manager.

The application for the sixth phase of Poland's . The application for the sixth phase of Poland's "My Electricity" rebate program began earlier this month, offering a total subsidy of PLN 400 million (approximately CNY 738 million) for residential photovoltaic (PV), battery storage, and hot water storage systems.

Renewable energy developer and independent power producer (IPP) Greenvolt won 1.2GW of 17-year contracts for six battery energy storage system (BESS) projects it bid in, the company revealed on the same day. It claimed this equated to over 70% of total capacity awarded to BESS technology, implying the total awarded to BESS was around 1.7GW.

Energy storage developer Pacific Green has agreed to acquire two large-scale in-development battery energy storage system (BESS) projects in Poland, Europe. The acquisition of two 50MW projects totalling 400MWh of ...

A panel discussion on the Polish market at the recent Energy Storage Summit CEE in Warsaw. Image: Solar Media . The European Commission (EC) has approved a EUR1.2 billion (US\$1.32 billion) state aid package for Poland to support the deployment of electricity storage facilities.

Poland's National Fund for Environmental Protection and Water Management has opened applications for the sixth edition of its "My Electricity" rebate scheme.. Net-billing prosumers who incurred installation expenses after Jan 1, 2021, are eligible. The maximum subsidy available for solar without storage is PLN 6,000, increasing to PLN 7,000 for solar ...
