

How much solar energy does Portugal produce?

In a bold announcement, Portugal recently surpassed its entire solar output from 2023 by September 2024, celebrating a record year for solar energy production. According to REN (Rede de Energia Nacional), the country generated more than 3.99 TWh of solar energy in just the first nine months, exceeding last year's total of 3.6 TWh.

How can Portugal meet growing energy demands in a sustainable way?

Meanwhile, the rapid expansion of hydroelectric and solar energy capacity is helping Portugal meet growing energy demands in a sustainable way. These efforts align with European Union objectives, such as the RePowerEU plan and the Renewable Energy Directive, which targets 42.5% renewable energy in total consumption by 2030.

Is Portugal ready for a new solar project?

"Now Portugal is facing a huge demand of developers to build new PV utility-scale plants, as well as a big demand for decentralized solar projects, taking advantage of a low-cost technology to increase the share of renewable energy in the years to come."

Why is wind energy important in Portugal?

Wind energy remains a crucial component of Portugal's electricity production, accounting for 25% of the total. Meanwhile, the rapid expansion of hydroelectric and solar energy capacity is helping Portugal meet growing energy demands in a sustainable way.

What is the largest solar park in Portugal?

Neoen (ISIN: FR0011675362, Ticker: NEOEN), one of the world's leading producers of exclusively renewable energy, announce the start of construction of the largest solar park in Portugal, with a capacity of 272 MWp.

Can Portugal run entirely on renewables?

But the last time Portugal had ideal conditions for a renewables record, it only lasted one-third as long without burning gas. As more wind and solar capacity comes online, Portugal expands its arsenal for running entirely on renewables. This particular week stood out, but it exemplifies a historic shift in energy sources.
