

What is powerup energy technologies?

PowerUP Energy Technologies mission is to improve sustainability and reliability of the energy systems. With a vision for a cleaner tomorrow, PowerUP develops and manufactures high-quality, sustainable energy generation products. Boasting 20 years of experience in fuel cell technology, we stand as an innovator in the fuel cell technology market.

Can I share my personal information with PowerUP energy technologies?

Never share sensitive information (credit card numbers, social security numbers, passwords) through this form. This site is protected by reCAPTCHA and the Google Privacy Policy and Terms of Service apply. PowerUP Energy Technologies provides hydrogen fuel cells generators, a sustainable innovative source of energy.

How does powerup generator work?

Clean power, green future. PowerUP's generators are based on proton exchange membrane (PEM) fuel cells, which makes power generation efficient and environmentally friendly. Our fuel cell based generators use hydrogen gas as fuel. The chemical energy of the fuel is directly converted to electrical energy.

The aim of this project is to develop new and innovative bipolar plates (BPP) and membrane electrode assembly (MEA) for PowerUP's air cooled fuel cell stack. Project is in a partnership with a France company HYCCO who will develop novel and ultra-thin carbon fiber based BPPs. This is of high importance since BPPs contribute to around 70% of the ...

Estonian-based PowerUP Energy Technologies recently unveiled its first-ever hydrogen fuel cell generator, dubbed UP400, that is targeting the recreational industry by producing 400W of portable clean ...

PowerUP Energy Technologies is an Estonian deep tech company that develops and produces innovative and environmentally friendly energy solutions. Under the BalticSeaH2 project, PowerUP will develop and test an energy system which has both fuel cell, and electrolyser in one box and can generate green hydrogen and clean electricity by the ...

These energy sources need to be coupled with efficient battery storage systems to ensure an optimal response to the grid demand. ... to the deployment of large-scale renewable energies at the local, territorial, or national level. For this very reason, PowerUP provides integrators and operators of these battery storage systems with advanced ...

The emissions reductions were created in a new UpEnergy-led project aimed at replacing traditional, biomass burning stoves with an innovative electric stove created by climate tech startup PowerUP. The PowerUP electric pressure cooker (EPC) is designed for low income households in several countries across sub-Saharan Africa.

Amidst the backdrop of global challenges, PowerUP Energy Technologies introduces the UP3K, a groundbreaking 3kW hydrogen-powered generator that epitomises resilience in power generation. The UP3K arrives as a robust solution to the escalating power outages exacerbated by climate change and geopolitical unrest.

PowerUP Energy Technologies mission is to improve sustainability and reliability of the energy systems. With a vision for a cleaner tomorrow, PowerUP develops and manufactures high-quality, sustainable energy generation products. Boasting 20 years of experience in fuel cell technology, PowerUP stands as an innovator in the fuel cell technology market. . The UP series generators ...

PowerUP Energy Technologies to develop closed cathode hydrogen fuel cells for Lunar and Mars missions. August 4, 2021. The Estonia cleantech start-up today on August 2 formalized the news, stating that, as well ...

While solar panels and wind turbines are a great source of power, their reliability is limited due to weather conditions. With our miniature smart-grid solutions you can complement your green power generation. If other methods aren't ...

PowerUP is proud to announce that we have not only established a partnership with the Estonian branch of telecommunication giant Telia, but will be continuing our growing partnership into the foreseeable future.

PowerUP Energy Technologies is committed to deliver renewable energy technologies to the market. We are currently concentrating on the production and development of hydrogen fuel cell-based ...

Project update 2022. During the last quarter of 2022 Beyonder has finalized this project's first version of high-power energy storage cells, which will soon be ready for shipment to Nordic Batteries to be included in the first proof of concept ...

Our novel solution allows you to connect the fuel cell unit in combination with an external battery with solar panels and wind turbines to produce and store excessive energy for future usage. The UP400 integrates fuel cells with pioneering battery technologies to make the generator smart.

PowerUP Energy Technologies will develop a 1kW liquid-cooled closed cathode hydrogen fuel cell stack for the Lunar cargo ships - and it has inked a new contract with the European Space Agency for the effort.

The 1kW closed cathode hydrogen fuel cell technology stack will be used on Lunar cargo ships and potentially even rovers, becoming an additional energy source along with solar panels and batteries. This innovative ...

Power Up will provide distributors in Uganda with quality IoT-enabled connected EPCs that will be linked to a data analytics platform, in combination with vendor financing. ... creating enhanced energy access for 138,000 people and reducing 106,421 tCO<sub>2</sub>e annually. In addition, PowerUp plans to create 13 permanent

jobs, with 33% of leadership ...
