

Does Puerto Rico have a solar program?

To further assist Puerto Rico's energy resilience and clean energy goals, DOE today announced that on February 22, 2024, residents can apply for DOE's Programa Acceso Solar (Solar Access Program) -- a program designed to connect up to 30,000 low-income households with residential rooftop solar and battery storage systems with zero upfront costs.

How much money does Puerto Rico have to pay for solar?

Up to \$190 million is available to Puerto Rico's Housing Administration and a private company to pay for solar and battery installations in public housing common areas and subsidized, multifamily housing properties. Another \$175 million is available for certain healthcare and dialysis centers.

How do low-income families get solar in Puerto Rico?

Today, low-income families across Puerto Rico can go to [energy.gov/solarPR](https://energy.gov/solarPR) to check their eligibility, prepare required documentation, and identify their local Solar Ambassador. Solar Ambassadors consist of 16 local organizations selected by DOE to conduct outreach in targeted communities and to process applications to the Programa Acceso Solar.

What is the Puerto Rico energy Resilience Fund?

This program is a consumer-facing application phase of the first round of funding from the Puerto Rico Energy Resilience Fund, a \$1 billion DOE program focused on improving the resilience of Puerto Rico's electric grid with an emphasis on the region's most vulnerable and disadvantaged households and communities.

Will Puerto Rico's rooftop solar capacity increase by 2050?

Under all scenarios of the study, Puerto Rico's rooftop solar capacity and storage capacity will significantly increase by 2050. Even if rooftop solar and batteries are added to all suitable rooftops, utility-scale renewable energy and storage projects will still be needed to meet electric load reliably.

Does Puerto Rico need new power generation infrastructure?

Puerto Rico must increase new power generation infrastructure significantly--on the scale of hundreds of megawatts--to stabilize the grid and alleviate current generation shortfalls, including rapid deployment of utility-scale and distributed renewable resources and significant amounts of storage.

On February 21, 2023, the Grid Deployment Office launched the Puerto Rico Energy Resilience Fund (PR-ERF) to support Puerto Rico's grid resilience efforts and achieve the goal for the commonwealth to meet 100% of its electricity needs with renewable energy by 2050. After recent natural disasters and decades of underinvestment in the electric grid, this fund is ...

Se estima que la red será resiliente en tres años, tras una inversión de \$21,000 millones. Por Esther Alaejos . Agencia EFE. San Juan, Puerto Rico - En Puerto Rico se lleva a cabo la transformación eléctrica posiblemente más grande del mundo; y su red tardará unos tres años en ser resiliente, afirma a EFE el director de Asuntos Externos de la empresa eléctrica LUMA ...

Se estima que la red será resiliente en tres años, tras una inversión de \$21,000 millones. Por Esther Alaejos . Agencia EFE. San Juan, Puerto Rico - En Puerto Rico se lleva a cabo la transformación eléctrica posiblemente más grande del ...

As official hurricane season barrels down on the Caribbean, this month the LUMA Energy consortium embarks on an unprecedented \$20 billion, 15-year project to rebuild the damaged, long-neglected electric infrastructure on Puerto Rico.

On July 18, 2024, DOE's Loan Programs Office (LPO) announced a conditional commitment for a loan guarantee of up to \$861.3 million to Clean Flexible Energy, LLC. The loan guarantee will finance the construction of two solar photovoltaic (PV) farms equipped with battery storage and two standalone battery energy storage systems (BESS) in Puerto Rico.

Puerto Rico committed to meeting its electricity needs with 100% renewable energy by 2050. The Puerto Rico Grid Resilience and Transition to 100% Renewable Energy (PR100) study, led by DOE's Grid Deployment Office and supported by FEMA, is a two-year effort that has resulted in stakeholder-driven pathways for Puerto Rico to meet its clean energy goals.

Up to 25-year project life with AES Puerto Rico as the long-term operator; Low and stable electricity cost approved by the Puerto Rico Energy Bureau, helps protect against volatile fossil fuel prices; PREPA customers will receive clean energy produced by the project with transmission and distribution managed by Luma Energy

3 ???; The Puerto Rico Energy Public Policy Act (Act 17) requires Puerto Rico's utility to cease all coal-fired energy generation by 2028 and shift to a 100% renewable energy mix by 2050. To help Puerto Rico reach 100% clean energy resources by 2050, the solar PV system can generate power directly to Puerto Rico's grid, and the battery facilities ...

San Juan, Puerto Rico--The U.S. Department of Energy (DOE) and the Federal Emergency Management Agency (FEMA) today released a summary report for the Puerto Rico Grid Resilience and Transitions to 100% Renewable Energy Study (PR100). The two-year study concludes that Puerto Rico can successfully meet its projected electricity needs with 100% ...
