Does Paraguay have hydro power?

[español]o [português]This page is part of Global Energy Monitor 's Latin America Energy Portal. In 2020,hydro power provided 100% of Paraguay's electricity and roughly half of the country's overall energy supply, with biofuels and imported oil accounting for the remainder.

How is energy sourced in Paraguay?

Energy in Paraguay is primarily sourced from hydropower, with pivotal projects like the Itaipu Dam, one of the world's largest hydroelectric facilities. This reliance underscores the need for a robust infrastructure, including efficient transmission networks and distribution systems, to leverage the country's renewable resources fully.

What is the energy mix of Paraguay?

También disponible en Español. The energy mix of the Republic of Paraguay is dominated by clean energy sources, where hydropower accounts for the largest share of the country's power generation, representing around 99.5% of the installed power capacity.

Who regulates energy projects in Paraguay?

Permitting and regulation of energy projects is handled by the Viceministry of Mines and Energy. ANDE (Administración Nacional de Electricidad) is the state-owned entity responsible for satisfying Paraguay's electrical needs through generation,transmission,and distribution. Paraguay does not have a national oil company.

Why does Paraguay have a shortage of Energy Workers?

Currently, Paraguay is experiencing an imbalance between supply and demand for trained personnel with skills in energy-related activities, including energy policy, regulation, installation and maintenance of renewable energy systems, certification of technologies and project development, among others.

How does hydropower development affect wetlands in Paraguay?

Hydropower development in Paraguay has caused changes to hydrologic and ecological systems, prompting studies focused on the maintenance and preservation of wetlands, particularly in the Upper Paraguay and Paraná: river basins.
