Where is Malawi's first solar power plant located?

The centrally located facility is Malawi's first solar power plant connected to the national grid, a project successfully completed under a public-private partnership (PPP). The President of the Republic of Malawi Lazarus McCarthy Chakwera visited the Salima district, 101 km from the capital Lilongwe, on November 16, 2021.

How can decentralised solar mini-grids improve energy access in Malawi?

The project addresses the challenges of energy access in Malawi, where less than 12% of the population are connected to the national grid, limiting development and economic growth. Decentralised solar mini-grids offer a low carbon and reliable source of electricity in areas unlikely to receive a grid connection in the near future.

Is Malawi ready for a big Hydropower Project?

Several more projects are set to follow, but Malawi is now approaching solar saturation and ready to move on to larger hydropower plants like the 350MW Mpatamanga project on the Shire River. Salima was funded by JCM Power alongside the Private Infrastructure Development Group's InfraCo Africa and FMO.

Is Malawi a good place to invest in solar energy?

"Salima Solar is the first solar PV plant in Malawi to be connected to the national grid. As such, it is a model for future projects in several ways... In particular, it demonstrates that Malawi is an attractive destination for private sector investment in energy," says President Lazarus McCarthy Chakwera at the plant's inauguration ceremony.

Can Malawi absorb variable renewable power?

Battery storage and an interconnection with Mozambique and potentially Zambia will also increase Malawi's ability to absorb variable renewable power onto the grid. Grid capacity is another issue, with some areas becoming increasingly congested.

How does Malawi's power purchase agreement work?

The power purchase agreement (PPA) is in dollars, but will be paid in local kwacha; the IPP is responsible for converting and transferring currency. Malawi has an open auction system for currency which operates quite effectively, JCM Power chief executive Justin Woodward told African Energy.

Revised in August 2018, this map provides a detailed overview of the power sector in Malawi, Madagascar and the Indian Ocean islands (including Comoros, Mauritius and the Seychelles). The locations of power generation facilities that are operating, under construction or planned are shown by type - including liquid fuels, coal, thermal, hybrid, hydroelectric, solar ...
