

Is solar energy a reliable source of energy in Palestine?

In Palestine,solar energy is a reliable source of energydue to its high average radiation and sunshine rate per day ( Daoud,2018 ),Yet,the yearly progress of the solar energy is around 1% only as indicated by the Palestinian Energy Authority (PEA) plan ( PEA,2013 ). Fig. 1. PV panel project at Palestine Technical University - Kadoorie.

Why is solar power important in Palestine?

The solar power can be a key supplier of energy to the forthcoming generations in Palestine,due to the total amount of yearly sunshine's hours (3000 h) and annual solar radiation (5.4 kWh/m). Furthermore,solar water heating (SWH) is widely used in where about two third of residents own such systems.

Is Palestine a good place to invest in solar energy?

Palestine has some of the highest rate of solar water heating in the region, and there are a number of solar power projects. A number of issues confront renewable energy development; a lack of national infrastructure and the limited regulatory framework of the Oslo Accords are both barriers to investment.

Can rooftop photovoltaic help the Palestinian Gird?

Rooftop photovoltaic can play a role for the Palestinian gird and recently,several PV systems have been implemented in the West Bank by government or private companies as shown in Table 4,it is recommended to share the successful experience to encourage more industries and institution to develop their own sustainable energy supply system.

How many homes in Palestine use solar energy heaters?

Over half of all households in Palestine utilise solar energy heaters,although only 3% of houses depend on it as their main source. A 710kw photovoltaic plant was commissioned in September,2014 in the vicinity of Jericho; it is the largest plant in Palestine to date.

Can a wind turbine be used on a rooftop in Palestinian cities?

Due to the high population in Palestinian cities and its full of high-rise residential building which is considered an advantage to the wind turbine when it utilized in the rooftop, a higher power generation can be generated wind turbine which can be completely manufactured locally ( Juaidi et al., 2016 ). Fig. 12.
