

Is Saba a solar Island?

The entire island of Saba is powered by solar energy from 2 solar parks and battery storage, that became fully operational in 2019. Saba is one of the Caribbean islands leading the way in renewable energy. Dutch company Ecorus facilitated the photovoltaic (PV) module, while SMA Sunbelt Energy GmbH was responsible for setting up the battery storage.

Does Saba have solar power?

Saba is one of the Caribbean islands leading the way in renewable energy. Dutch company Ecorus facilitated the photovoltaic (PV) module, while SMA Sunbelt Energy GmbH was responsible for setting up the battery storage. When the weather is sunny enough the island can run on solar power for 8-10 hours, reducing the use of the diesel engines.

How will solar power benefit Brunei?

The solar power generated is equivalent to the electricity consumption of approximately 600 households per year and will offset some of the power used by the BSP Head Office. On a national level, the power generated will contribute towards Brunei's target of producing 100MWp renewable energy by 2025.

Does Brunei have a sustainable future?

Brunei is targeting 30% renewable energy in total power generation mix by 2035, with 200 MWp of solar energy by 2025. The launch event also saw the release of Hengyi's 2023 ESG Report, which highlights their progress in environmental sustainability, social responsibility, and governance.

What are the major solar installations in Brunei?

Major active solar installations in Brunei include the country's first, Tenaga Suria Brunei, launched in 2010 with a capacity of 1.2 MWp, and Brunei Shell Petroleum's 3.3 MWp solar plant, launched in 2021 to supply power to its headquarters. Both plants have plans for further expansion.

Where is BSP's flagship solar PV plant located in Brunei?

BSP's Flagship Solar PV Plant, located at G11 along Jalan Tengah, Seria is the second solar plant in Brunei, featuring the latest technology in solar panels. The construction of the plant took over seven months, where almost 7,000 solar panels were installed on the four hectares of land. The 3.3MWp plant produced its first power on 30th March 2021.
