SOLAR PRO. Saudi Arabia cea battery

Could Saudi Arabia become part of the global battery industry?

Saudi Arabia is a step closer to becoming part of the global battery industryafter deals to develop lithium processing and anode material projects in the country. The deals could make Saudi Arabia's lithium ion supply chain the most developed in the Middle East, which right now has virtually no battery material capacity.

Why is Saudi Arabia planning a second lithium processing facility?

Saudi Arabia is planning a second lithium processing facility, as it steps up efforts to work with western partners to develop its battery supply chain. The facility, which will use feedstock mined in Austria to produce refined lithium hydroxide for BMW, is a sign of how supply chains to process the metal are slowly developing outside China.

Will Saudi Arabia develop a lithium pipeline in 2021?

In 2021, Saudi Arabia became the first Middle Eastern country to establish pipeline capacity in lithium processing by signing an agreement with EV Metals Groups to build a battery chemicals complex in Yanbu Industrial City. The site could produce 18,050 tonnes of lithium hydroxide by 2030, according to Benchmark's Lithium Forecast.

Will Saudi Arabia develop a lithium hydroxide plant in 2026?

Earlier this year Saudi Arabia signed an agreement with EV Metals, an Australian battery manufacturer, to develop a lithium hydroxide plant that will be in production in 2026. Lithium processing is highly energy intensive and Sage said Saudi Arabia was an attractive location for a processing facility because of its cheap energy.

Does Saudi Arabia want an electric vehicle supply chain?

Saudi Arabia's ambitions for an electric vehicle supply chainare part of its push to diversify the national economy away from oil, a project guided by the government's Vision 2030 reform plan announced in 2016.

What does Saudi Arabia's oil wealth mean for EVs?

Saudi Arabia's oil wealth means it can afford to establish itself as a hubfor EVs to make use of whatever lithium it produces. The kingdom has established its own EV brand - Ceer - and has built an EV metals plant. The Kingdom's sovereign wealth fund, the Public Investment Fund, is set to fund 500,000 EVs annually by 2030.

The largest battery plant in the Middle East. Equipped with the best state of the art technology for battery production (Stamped Grid). 2 decades of expertise in battery manufacturing. Ability to produce all battery mix and fulfilling majority of ...
