

Using pile networking technology and mobile Internet technology to provide safe and convenient charging service for electric vehicle users, provide convenient and reliable operation management for charging pile manufacturers and charging facilities operators, build an ecological sharing charging service platform for different types of charging pile owners, realize "Internet + ...

Eybond has a deep photovoltaic background and rich experience in the Internet of things industry. It cooperates with inverter manufacturers to develop photovoltaic intelligent operation and maintenance solutions for different occasions. ... Nanshan District, Shenzhen, China +86-755-89992588. Solutions. WeChat. ShineMonitor.

Shenzhen Eybond Co., Ltd, is a professional engaged in the Iot, technology research product development and lineIndustry application of the national high-tech wood enterprises In the process of rapid development, the company insists on model innovation.

Dessmonitor optical energy storage management platform, based on the back-end server products of Eybond IOT cloud, provides users with application services such as data collection, analysis, calculation, storage, alarm push, ...

Eybond is committed to the energy industry, developed by itself can be compatible with a variety of types of different brands of data collector and powerful control can treasure energy management system. Related equipment for real-time monitoring and control of the energy industry, has realized the remote online monitoring of energy equipment ...

RTU series industrial series datalogger can support communication modes such as Wi-Fi, GPRS, 4G and Ethernet, and collect device data through multiple interfaces such as RS-485 and RS-232 has low requirements for the hardware interface and transmission environment of the device, and is perfectly compatible with inverter, energy storage machine, environmental ...

Shenzhen Eybond Co., Ltd, founded in 2014, is a high-tech enterprise specializing in solar PV system integration and monitoring, smart energy management and service. We have by far served more than 1000 EPC customers, solar plant owners And installers etc in all over the world.

Shenzhen Eybond Co., Ltd, established in 2014, is a high-tech enterprise specializing in technology research, product development and industrial application on internet+new energy. Based on rich industry experience and new technology on the internet of things, cloud computing, and big data, Eybond has achieved great success in energy monitoring ...

Shinemonitor System, based on the back-end server products of Eybond IOT cloud, provides users with application services such as power station management, equipment data acquisition, analysis, calculation, storage, alarm push, power station on-site video monitoring, etc. through advanced computing such as cloud computing, big data, intelligent sensor, etc. for the needs of ...

Plug series pluggable datalogger can support GPRS and Wi-Fi. With the advantages of IP65 protection level, simple installation, strong anti-interference ability, it is no need to configure power supply and antenna; it can support the remote control, remote debugging, remote upgrading and other functions of the device, and can view the working status and power generation of the ...

Magicbox Pro is one of the key device to build a centralized control center. It collects data of local device through RS-485, or obtains data of cloud server through Ethernet (RJ-45), Wi-Fi and 4G, and displays monitoring data through display, projector, splicing screen, etc.

According to the characteristics of UPS, Eybond provides a variety of scenarios for UPS monitoring to ensure the normal operation of UPS. Wi-Fi Local(near field) Monitoring Scheme. ... Building 10, Zhiheng Sicense & Technology Park, Nanshan District, Shenzhen, China +86 ...

Shenzhen Eybond Co., Ltd. Send inquiry. Performance. 4.7 /5. Satisfied 15 reviews. <=2h. average response time. 80.0%. on-time delivery rate-- orders. Minor customization. Design-based customization. Raw-material traceability identification. Finished product inspection. See all verified capabilities (14)

Gridbox is a device to prevent the electric energy from photovoltaic system from feeding into the public grid. It connects with the inverter through RS-485, uploads the data to the cloud server through wireless networks such as Wi-Fi, GPRS, 4G, etc. it can monitor the data of power generation, power consumption, power purchase in real time, support remote monitoring, set ...

MagicBox Pro is one of the key device to build a centralized control center. It collects data of local device through RS-485, or obtains data of cloud server through Ethernet (RJ-45), Wi-Fi and 4G, and displays monitoring data through display, projector, splicing screen, etc.

Eybond has rich experience in monitoring the energy IOT industry. You only need to raise the demand and leave the rest to us. At the same time, we have rich software products related to energy IOT industry. ... Building 10, Zhiheng Sicense & Technology Park, Nanshan District, Shenzhen, China +86-755-89992588. Solutions. WeChat. ShineMonitor.
