

How do I charge my bluepalm power station?

Flexibility when charging your Bluepalm power station. The Power Station has three charging options: mains power, car adapter and solar. The built-in controller supports solar inputs of up to 1,000 W (solar panel idle voltage range 12 V-60 V).

What is Singapore's next phase of power generation?

Singapore's next phase of power generation prioritises greener energy sources such as natural gas or renewables. In line with Singapore's power generation story, the adaptive reuse and 'rebirth' of St James today as the headquarters for a leading global technology company marks a symbolic shift towards sustainable practices.

What makes St James Power Station unique?

The most distinctive features of St James Power Station was its large red-brick walls, its long rows of full-length windows (made up of stained glass) and its two chimneys.

Entdecken Sie die ultimative portable Powerstation von Bluepalm mit 518 Wattstunden - der ideale Begleiter für alle, die sowohl zuhause als auch unterwegs ständig mit Strom versorgt sein möchten. Mit einer Ausgangsleistung von 800 Watt und 240 Watt Eingang bietet die Powerstation alles, was Sie für Ihre Bedürfnisse benötigen.
